

Diabetes/Blood Sugar Testing Results

Daily scheduled times for Blood Sugar testing should be set up through Entry, Procedures Daily and results entered there for those appointment times.

Unscheduled times (prn) for Blood Sugar testing results should be documented from Activity screen entry 'Diabetes' as it requires an assessment, even if it is a later follow up of a scheduled time.

Blood sugar results can be entered into the Diabetes entry from both procedures and activity entry so that all documentation ends up in one location that can be easily printed to provide to a parent or physician.

When entering results in Daily procedures: Make sure the cursor is on the line of the student you are wanting to document BS on and that you have no activity entry screens open (minimized) even if there is no name in the activity entry. If you do you will find a pop up that says 'Displays Student. Cannot change here' when you click on the + which enters date and time.

The screenshot shows the 'Daily Nursing Procedure Results' window with a table of procedures. A 'Student Glucose Level Entry' pop-up window is overlaid on top. Red arrows point to the '+' button in the pop-up and the 'Blood Sugar' link in the procedure table.

Sched	Start	Stop	ET	Result	Student ID	#	Procedure
10:00 AM	10:00 AM	10:10 AM	10	Performed	A Test, Anicholas	1	Assisted with Behavioral Manage
10:00 AM	10:00 AM	10:20 AM	20	Performed	A Test, Anicholas	1	Blood Sugar Testing & Treatment
10:10 AM
