

## H1N1 Vaccine Tracking Added to CHIP-AZ v12

First, an important note from Mary Hallett:

✓ Health office staff – make sure you are coding students displaying flu like symptoms with a code 582.22 and 582.33. (Description – Respiratory – influenza-like illness (ILI) – Fever that is greater than or equal to 100 degrees and a cough and/or sore throat. (CDC definition)  
Your data is very important to your state and your county.

1. We will be adding H1N1 to the list of immunizations tracked in CHIP-AZ, Review, Student, Immunizations screen.
2. We will be adding H1N1 to the Reporting Utility that allows one to display/print a list of students with less than (input) number of doses of a vaccine.
3. If H1N1 vaccine becomes available prior to release of version 12 it is suggested that CHIP users enter H1N1 when administered in the **notes** section of CHIP-AZ, Review, Student, Immunizations screen.
  - a. If entered as H1N1 or h1n1 we will provide a utility to list students with H1N1 in their notes. Entry of “swine” or “flu” will not do it.

Student	Info	Emerg	Follow Up	History	Chronic	Immunization	S
